

Co – Branded

**Chromosomal aneuploidy
screening from maternal blood cfDNA**

All in a single reaction:

- Trisomy 21, 18, and 13 detection
- Fetal fraction
- Gender determination

**High multiplex digital PCR
with the naica® system**

Three hours from sample to result
with minimal hands-on time

Simple workflow of the iSAFE™
NIPT Assay with Crystal Digital PCR™

iSAFE™ NIPT Assay Prenatal Screening Technology

*For Research Use Only. Not for use in diagnostic procedures.
Stilla Technologies Co-Branded iSAFE™ NIPT Assay is only available in selected regions.
The exclusion of commercial NIPT services applies only in the United States and the European Union.*

BEST-IN-CLASS dPCR SOLUTION

cfDNA extraction

PCR reaction assembly

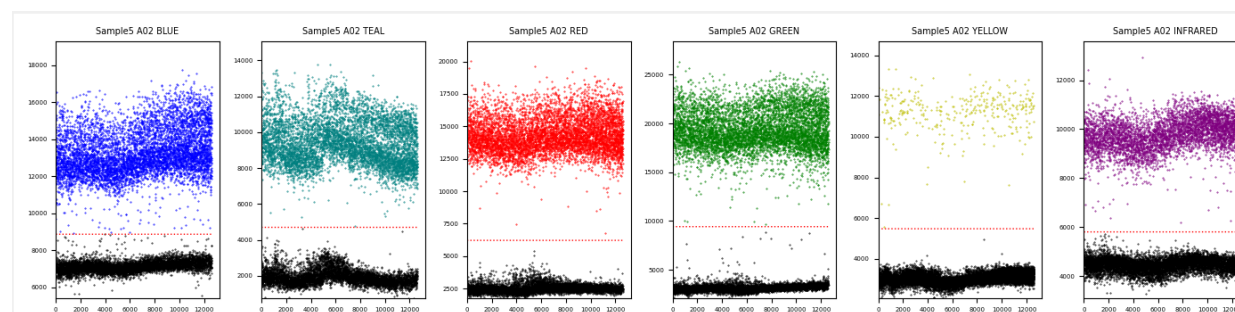

Load the Sapphire Chip

dPCR and data collection

**Data analysis with
Atila iSAFE™ NIPT Software**
