

Cancer Multiplex Mutation Screening Assays

- **Single Mutation Quantification**
- **Multiplex Mutation Screening on the naica® system**
- **Cancer Panel Screening in a single Ruby Chip chamber**
- **Simple workflow with Cystal Digital PCR®**

Assay Specifications

Assay Time	2-3 Hours
Hands-On Time	0.5 Hour
Size Format	100 reactions
Assay Compatibility	6-color naica [®] system with the Ruby Chip (Stilla Technologies)
Sensitivity	Minimum LOD down to 0.80 cp/uL (95%)

Ordering Information

ACPD-EG-100	<i>EGFR</i> Multiplex Mutation Screening Assay
<i>ACPD-KR-100</i>	<i>KRAS</i> Multiplex Mutation Screening Assay
ACPD-NR-100	<i>NRAS</i> Multiplex Mutation Screening Assay
ACPD-TP53-100	<i>TP53</i> Multiplex Mutation Screening Assay
ACPD-HE-100	<i>HER2</i> Multiplex Mutation Screening Assay
ACPD-AP-100	<i>APC</i> Multiplex Mutation Screening Assay
ACPD-PI-100	<i>PIK3CA</i> Multiplex Mutation Screening Assay
ACPD-BR-100	<i>BRAF</i> Multiplex Mutation Screening Assay
ACPD-RE-100	<i>RET/MET</i> Multiplex Mutation Screening Assay
ACPD-LN-100	Lung Cancer Mutation Screening Assay
ACPD-CR-100	Colorectal Cancer Mutation Screening Assay
